

# Hany El Atlassi

✉ elatlassi.hany@gmail.com • 🌐 thegitslender.dev • in el-atlassi-hany

## Profile

AI & Cloud engineering student with hands-on experience building and deploying ML systems on AWS, designing multi-agent AI pipelines, and shipping production-grade infrastructure. Open to relocation.

## Education

### Ecole Nationale Supérieure d'Arts et Métiers

Cybersecurity & Cloud Engineering

2022 – 2027

- Research paper: LLM-driven autonomous rule generation in SIEM systems (Wazuh + DistilBERT, benchmarked against classical ML baselines)

## Work Experience

### Outlier.ai

AI Trainer

Oct 2024 – Present

- Rate and correct AI-generated code; logic errors, edge cases, optimization; structured output feeds RLHF training pipelines
- Review agentic behavior and function-calling decisions in multi-step workflows, providing preference data for model alignment

### 3D Smart Factory

Machine Learning Intern

Jun 2024 – Sep 2024

- Trained Superpoint Transformer on 30GB+ Stanford 3D Indoor Scenes dataset; achieved 90% accuracy and 70% mean IoU
- Deployed real-time interactive demo as a Streamlit web application

### CIAM AI Club, ENSAM

President

200+ members

Sep 2023 – Jun 2025

- Led Python and ML workshops; managed cross-functional teams across computer vision, classical ML, and software development

## Projects

### Voice AI Interview Platform

InterviewForge

- Built real-time voice interview platform: 7-agent LangGraph pipeline, Deepgram STT → LLM → TTS over LiveKit WebRTC, targeting sub-800ms round-trip latency
- Chose cascade over native speech-to-speech, cutting inference cost  $\sim 20\text{--}40\times$  for long sessions; knowledge layer with Qdrant, Redis, and PostgreSQL

### Federated Learning for Voice Personalization

VoiceFL

- Designed FedPer architecture with differential privacy (Opacus) and Secure Aggregation (Flower SecAgg+) for on-device voice model personalization
- Building anomaly detection layer; full MLOps pipeline on AWS (EKS, SageMaker, MLflow) within a \$130 budget

## Achievements

- **Top 10 globally, Mistral AI Worldwide Hackathon** — MedRound, AI clinical safety assistant (Mistral OCR + voice AI pipeline)
- **1st Place, Agoral Hackathon** — PolicyBridge, AI policy impact simulator for Moroccan AI regulation; project selected for presentation at UM6P Spring School AI for Impact (international academic conference)
- **CTF**: Top 3% worldwide (HTB Forensics); top 10–15 nationally across multiple Moroccan CTF competitions

## Skills & Certifications

**AI/ML**: PyTorch, TensorFlow, Scikit-Learn, LangGraph, LangChain, Flower (Federated Learning), Opacus, LiveKit, Deepgram

**Cloud & DevOps**: AWS (EKS, SageMaker, Lambda, ECR), Docker, Terraform, Git/GitHub, Linux

**Security**: OS/Memory forensics, network analysis, NTFS Artifacts

**Languages**: Python, C/C++, Java, SQL, Bash | English (Fluent), French (Fluent), Arabic (Native)

**Certifications**: IBM AI Engineering Professional Certificate, Deep Learning Specialization, Reinforcement Learning Specialization, McKinsey Forward Alumni
